Figure 25-DXH

Oil Controlled Closing Swing Check Valve

Data Sheet 25DXH.01B

Description

GA Industries Figure 25-DXH swing check valves open freely and provide two-stage closure to minimize pressure surge. Following pump shutdown, the valve closes rapidly until the hydraulic system is engaged which then controls the final stage closing speed. The point at which the hydraulic system is engaged and the final closing speed are adjustable to allow a controlled amount of flow reversal during the final stage thereby reducing the pressure surge.

The Figure 25-DXH is tight sealing, suitable for water or sewage and effective at minimizing pump shutdown surges.

Product Features

- Opens to full flow area when swung only 25° away from seat for low head loss and reduced pumping cost
- · Tough, durable resilient seat for drop tight sealing
- · Bolted cover allows access to all internal components
- Side mounted hydraulic system, accessible and serviceable without dewatering the valve

Standard Materials

Body & Disc
 Cast Iron, ASTM A126 Class B

Cover Steel, ASTM A36

• Body Seat Stainless Steel, Type 316

Disc Seat Thiokol

Hinge Shaft Stainless Steel, Type 303

• External Fasteners Steel, A307, Zinc Plated

Corrosion Protection

Standard: Uncoated Internal, Enamel Primer

External

See Option P2 for upgraded corrosion protection package

Non-Shock Working Water Pressure at up to 150F (66C)									
Figure No.	25-DXH								
Flange	ANSI B16.1 Class 125								
Size	3" to 12"	14" to 16"	18" to 20"	24"					
Max Working Pressure*	150 PSI	125 PSI	100 PSI	50 PSI					
Shell Test	225 PSI								

^{*} Maximum pressure across closed valve in reverse direction

Options

 Option 1D 	With Honeywell HDLS NEMA 1, 3, 4					
	4X 6 6P 12 & 13 DPDT Limit Switch					

 Option VI Configured for Vertical Flow Up Installation

Option S3 Type 316 Stainless Steel Hinge Shaft

Option P2: Minimum 6 mil Internal and External

2-Part NSF-61 Carboline 891 Epoxy and

316 SS External Fasteners
