

# Figure 25-DXH Oil Controlled Closing Swing Check Valve

## Description

GA Industries Figure 25-DXH swing check valves open freely and provide two-stage closure to minimize pressure surge. Following pump shutdown, the valve closes rapidly until the hydraulic system is engaged which then controls the final stage closing speed. The point at which the hydraulic system is engaged and the final closing speed are adjustable to allow a controlled amount of flow reversal during the final stage thereby reducing the pressure surge.

The Figure 25-DXH is tight sealing, suitable for water or sewage and effective at minimizing pump shutdown surges.

## Product Features

- Opens to full flow area when swung only 25° away from seat for low head loss and reduced pumping cost
- Tough, durable resilient seat for drop tight sealing
- Bolted cover allows access to all internal components
- Side mounted hydraulic system, accessible and serviceable without dewatering the valve

## Standard Materials

- Body & Disc Cast Iron, ASTM A126 Class B
- Cover Steel, ASTM A36
- Body Seat Stainless Steel, Type 316
- Disc Seat Thiokol
- Hinge Shaft Stainless Steel, Type 303
- External Fasteners Steel, A307, Zinc Plated
- Coating Internal and external Carboguard 891 NSF-61 certified 2-part epoxy

Non-Shock Working Water Pressure at up to 150F (66C)				
Figure No.	25-DXH			
Flange	ANSI B16.1 Class 125			
Size	3" to 12"	14" to 16"	18" to 20"	24"
Max Working Pressure*	150 PSI	125 PSI	100 PSI	50 PSI
Shell Test	225 PSI			

\* Maximum pressure across closed valve in reverse direction

Data Sheet 25DXH.01C

## Options

- Option 1D With Honeywell HDLS NEMA 1, 3, 4, 4X, 6, 6P, 12 & 13 DPDT Limit Switch
- Option S3 316 Stainless Steel Hinge Shaft
- Option SE: 316 Stainless Steel External Fasteners
- Option VI Configured for Vertical Flow Up Installation

## Ordering Data

- Figure Number (25-DXH)
- Size
- Options and/or Accessories

## Full Open Head Loss
