

Figure B517RF 100% Port Mechanical Joint (MJ) Eccentric Plug Valves For Buried Service

Description

The GA Industries Figure B517RF Eccentric Plug Valve is a rugged, field-proven valve that will provide many decades of trouble-free service. The valve has a port area equal to 100% of the inside area of the adjacent pipe providing the lowest possible head loss.

The Figure B517RF Eccentric Plug Valve epoxy coated ductile iron body has upper and lower thrust bearings, grit seals and all surfaces of the ductile iron plug exposed to the flow are totally encapsulated in rubber.

The valve is standard with a sealed and grease packed buried service manual worm gear and a 2" square nut. Automatic actuation with floor stand or extended bonnet are also available.

Standard Features

- Internal and external epoxy coated, high strength ductile iron body and cover
- 100% port area, up to 53% less head loss than standard rectangular port plug valves
